

**Discrete Mathematics**  
**Volume 210, Numbers 1–3, 6 January 2000**

**Contents**

**Preface**

<i>P. Leroux and D. Stanton</i>	1
---------------------------------	---

**Contributions**

<i>S.A. Abramov, M. Petkovšek and A. Ryabenko</i> Special formal series solutions of linear operator equations	3
---	---

<i>E.M. Feichtner and D.N. Kozlov</i> On subspace arrangements of type $\mathcal{D}$	27
---	----

<i>S. Feretić</i> An alternative method for $q$ -counting directed column-convex polyominoes	55
---	----

<i>O. Guibert</i> Stack words, standard Young tableaux, permutations with forbidden subsequences and planar maps	71
---	----

<i>Hoang Ngoc Minh and G. Jacob</i> Symbolic integration of meromorphic differential systems via Dirichlet functions	87
---	----

<i>W.P. Johnson</i> Some polynomials associated with up-down permutations	117
--	-----

<i>G. Melançon</i> Lyndon factorization of sturmian words	137
--	-----

<i>M. Schlosser</i> Summation theorems for multidimensional basic hypergeometric series by determinant evaluations	151
---	-----

<i>B. Sturmfels</i> Solving algebraic equations in terms of $\mathcal{A}$ -hypergeometric series	171
---	-----

Author index to volume 210	183
